
LOGISTICS PROVIDERS AND CARRIERS

Since there is only a limited space for storage at the bcc we recommend you to contract a logistics provider and/or shipping carrier to take care of large shipments and storing of exhibition material during the duration of your function.

There are experienced, local logistics provider and carrier who have some knowledge about the premises of the bcc as well about Berlin and its surroundings. These providers offer a broad catalogue of services.

If you co-operate with a logistics provider, shipments must be sent directly to the contracting partner to be taken care of prior to the event. All shipments will be delivered to the bcc on the first day of set-up and distributed to the individual destinations, e.g. exhibition booths.

Empty boxes, crates and pallets will be stored at the premises of the logistics provider. They will as well take care of shipping all goods back to the original sender.

Further some carriers offer additional services such as door to door shipments as well as supplying and operating of forklifts and/or pallet jacks.

The complexity of services includes transportation, inventory, and material handling before and after the event.
